Special Issue on

The Economics of the Energy Transition

Guest Editors: [Natalia Fabra](#) (Universidad Carlos III de Madrid) and [Xavier Labandeira](#) (Universidade de Vigo)

Scope: The so called energy transition, i.e. the energy-related transformations to reach decarbonized societies, will have profound socio-economic implications. In this issue we are looking for rigorous theoretical and empirical papers that contribute to understand the main policy challenges and macro and microeconomic effects associated with the energy transition. Among others, we invite submissions that cover the following topics:

- Public policies related to energy and climate mitigation
- Distributional impacts of the energy transition
- Effects of the energy transition on growth and job creation
- Sustainable finance and its contribution to the energy transition
- Political economy issues related to the energy transition
- The role of companies in the energy transition

Submission Deadline: May 30, 2020

Submissions Instructions: Full manuscripts should be submitted electronically through the web page of the *Journal of the Spanish Economic Association-SERIEs* ([link](#)). Please, remember to select the option “SI: The Economics of the Energy Transition” in the prompt for "Select article Type". First decisions and comments will be sent out no later than **September 1, 2020**.

The [Journal of the Spanish Economic Association-SERIEs](#) is a single-blind peer-reviewed open access journal published under the brand SpringerOpen. The journal publishes scientific articles in all areas of economics. The Web of Science two-year impact factor is 0.833 in 2018 and in Scopus, it is among Q1 journals (top 25%) in 2018 according to Scimago Journal Ranking and the *CiteScores*.
